ORGANOID TECHNOLOGIES

DECORATIVE COATINGS

»Organoid decorative coatings are characterized by their naturalness and authenticity. They allow a new experience of natural raw materials through all the senses.

We only use natural and authentic raw materials, which are not used in conventional production processes. In our factory in Tyrol – in the heart of the Alps – we pay attention to ecological and sustainable manufacturing. This begins with the use of a 100% green electricity and ends with our biological binders that are free of biocides, plasticizers and solvents.

This is the only way to achieve this unique appearance with an authentic fragrance, natural feel and an impressive look.«

– Martin Jehart, inventor –

»Enjoy the unique scent/fragrance of authentic alpine hay, harvested by hand from 1,700 m altitude, grown on the slopes of the Wildspitze, the highest mountain in Tyrol. Each piece has been realized thanks to the care of an hand-made work.«

TECHNICAL DATA

THICKNESS OF COATING	depending on material 0.05–3.5 mm
CARRIER BOARD HPL	size 3,050 × 1,320 mm
	1.1 mm according to EN 438
	hardly inflammable according to EN 13501
SURFACE	without additional coating only for interior usage
PURCHASE QUANTITY	even one sheet promptly available from stock
	additional materials, carriers and sizes on demand

*slightly fragrant | **intense fragrant

WILDSPITZE* [vɪltʃpɪtsə]
ALPINE HAY GROWN AT
1,700 METERS A.S.L
