ORGANOID TECHNOLOGIES

DECORATIVE COATINGS

»Organoid® decorative coatings are characterized by their naturalness and authenticity. They allow a new experience of natural raw materials through all the senses.

We only use natural and authentic raw materials, which are not used in conventional production processes. In our factory in Tyrol – in the heart of the Alps – we pay attention to ecological and sustainable manufacturing. This begins with the use of a 100% green electricity and ends with our biological binders that are free of biocides, plasticizers and solvents.

This is the only way to achieve this unique appearance with an authentic fragrance, natural feel and an impressive look.«

– Martin Jehart, inventor –

»Let the intense fragrance of real Bourbon vanilla-pods seduce you. The signature scent of the main flavouring substance, Vanillin, produces both a soothing and a mood-lightening effect, at the same time.«

TECHNICAL DATA

THICKNESS OF COATING	depending on material 0.05 – 3.5 mm
CARRIER BOARD HPL	size 3,050 × 1,320 mm
	1.1 mm according to EN 438
	hardly inflammable according to EN 13501
SURFACE	without additional coating only for interior usage
SPECIAL SOLUTIONS	other surfaces, backings or sizes on demand
	all decorative coatings are available as acoustic solution
